
profile

I am a Web Designer and Developer specializing in User Interface design and development for both web and mobile devices. I enjoy constructing clean and efficient code that enables a better user experience while using a site.

experience

PHP DEVELOPER, *SLINGSHOT SEO*, INDIANAPOLIS, INDIANA 2010-2011

As an PHP Developer for Slingshot SEO, I developed web applications for the company's internal web software. I worked daily with multiple business partners and developers while building projects using validated HTML and CSS along with JavaScript, PHP and MySQL all while using the PHP framework CodeIgniter. All development was quality controlled before it was released. I worked in a Windows environment using strictly E text editor, Notepad ++ for development.

INTERACTIVE DEVELOPER, *MEDIASAUCE*, CARMEL, INDIANA 2008-2010

As an Interactive Developer for Mediasauce, I developed websites for clients such as Indiana Sports Corporation, Tabor Law Firm and PledgetoEndHunger.Com. I worked daily with multiple account managers, designers, and developers while building projects using validated HTML and CSS along with JavaScript, PHP and MySQL along with CMS platforms such as WordPress and Expression Engine. All development was quality controlled and crossed browser tested before final deployment. I worked in a Windows environment using strictly Notepad ++ for development and CMS, as well as Adobe Photoshop programs.

DESIGNER/DEVELOPER, *WEBLINK INTERNATIONAL*, INDIANAPOLIS, INDIANA 2008

As a Designer/Developer for Weblink International, I designed and developed websites for chambers of commerce such as the Greater San Antonio Chamber and York County Regional Chamber as well as user interfaces for the database management software and skinning web applications that accessed it. I worked daily with multiple clients and programmers designing, building and managing websites and dynamic applications for up to 15 website projects at a time using validated HTML and CSS along with JavaScript, ASP 2.0, VB. I worked in a Windows environment using mainly Notepad for development and CMS, as well as Adobe Flash and Adobe Photoshop programs.

FREELANCE DEVELOPER, *SELF-EMPLOYED*, INDIANAPOLIS, INDIANA 2006-2008

As a Freelance Developer I primarily worked as a sub-contractor to companies to design, develop and implement client's sites. I worked daily with the President of the sub-contracted companies while wire framing, designing and developing sites using validated HTML and CSS along with JavaScript. I worked in a Windows environment using mainly Notepad ++ and Microsoft Expression for development, as well as Adobe Flash and Adobe Photoshop programs.
